

CORPORATE PROFILE · 2026

Strategic textile sourcing, made dependable.

Independent textile sourcing and supply-chain coordination from Pakistan - connecting buyer requirements with suitable manufacturing capabilities, quality alignment and shipment readiness.

PAKISTAN · ESTABLISHED 2005

COMPANY OVERVIEW

Built on textile heritage. Focused on buyer success.

R.N. Textiles is an independent textile sourcing and supply-chain coordination company based in Faisalabad, Pakistan. Established in 2005, our roots in weaving and long-standing industry relationships give us practical understanding across the textile value chain.

We connect international buyers with carefully selected manufacturing capabilities - coordinating development, supplier matching, commercial follow-up, quality requirements and shipment readiness through one accountable sourcing point.

More than supplier access. One accountable sourcing partner.

We translate the buyer requirement into the right sourcing route, then stay engaged through development, approvals, production follow-up and shipment readiness.

Buyer-first. Independent. Technical. Transparent through execution.

The objective is not to add another supplier layer. It is to reduce sourcing friction, clarify the manufacturing route and keep one accountable coordination point visible to the buyer.

01 Buyer-first approach

Every sourcing decision begins with the buyer's end use, commercial priorities and risk profile.

02 Independent matching

Requirements are aligned with suitable spinning, weaving, processing and made-up capabilities.

03 Technical understanding

Practical knowledge supports better discussions on yarn, construction, processing and finish.

04 Transparent coordination

Clear communication on feasibility, approvals, risks, progress and changing production realities.

ONE ENQUIRY · ONE COORDINATED SOURCING PROCESS

Technical review → suitable production route → sample development → commercial comparison

Production follow-up → inspection → shipment coordination

Focused capabilities for diverse textile markets.

Workwear & Technical

From fabric construction to the finished-room experience.

We coordinate materials, finish, dimensions, sewing, labeling, packaging and performance for home and hospitality textile programs.

Bedding

Bed sheets, fitted sheets, pillowcases, duvet covers and coordinated sheet-set programs.

Hospitality

Percale, sateen and stripe sateen programs developed for hotel and institutional use.

Terry

Yarn-dyed stripes, checks, solids, bath towels, bath sheets and bathrobes.

Table Linen

Printed and solid table cloths, runners, placemats and seasonal decorative programs.

R.N. HOSPITALITY SIGNATURE 2027

Current curated development edition available on request.

JACQUARD & DECORATIVE

Woven texture with premium visual depth.

Elegant floral, damask, ornamental and paisley-inspired jacquard qualities for furnishing, decorative and premium home textile applications.

Development possibilities

- Classic neutral and contemporary colour directions
- Decorative woven textures and statement designs
- Product-specific weight, handle and finish alignment
- Custom development subject to feasibility and MOQ

One accountable coordination point - from requirement to shipment readiness.

01

Define

Construction, composition, finish, quantity, packaging and timeline.

02

Match

Select suitable manufacturing capabilities and compliance pathways.

03

Approve

Coordinate samples, lab dips, trial lots and buyer approvals.

04

Execute

Follow production, quality, testing and commercial milestones.

05

Deliver

Coordinate packing, documentation and shipment readiness.

Quality & compliance aligned to each program.

Certification pathways, testing and inspection are matched to the selected manufacturing route and confirmed for the relevant facility, product scope and current validity.
